School of Planning and Architecture, Bhopal was established by Government of India as an Institute of National Importance in the year 2008 and is governed by the SPA Act, 2014. The school is committed to contributing to the disciplines of Planning and Architecture and training students to take up the challenges of physical and socio-environmental development. The school aspires to develop as a 'University of imagination', where a sense of enquiry will prevail amongst all stakeholders- students, researchers, faculty and society at large.

The Institute offers bachelors, masters and doctoral courses. At the undergraduate level courses in Architecture and Planning are offered. At the postgraduate level, the school has Planning, Architecture and Design courses. The school has a strong focus in research and design and undertakes various projects in collaboration with national and international organisations of repute.

Defining New Planning and Design Paradigm

November 29 & 30, 2019

School of Planning and Architecture, Bhopal

www.spabhopal.ac.in

The modern discourse of the Anthropocene and its disconnect with the nature-aligned values has propelled the current sustainability and resilience challenges like climate change, disaster risk, migration. At this juncture, it is critical to rethink the existing Planning and Design paradigms to deal with the emerging challenges, especially concerning the marginalised and informal urban communities, which remain vulnerable to external and internal stresses and shocks.

BReUCom (Building Resilience Urban Communities), a capacity-building project in Higher Education, intends to address the issues mentioned above through a thematic focus 'Urban Resilience' in developing comparative case studies, courses and professional development programmes. Within its fold, the two-day symposium: Defining New Planning and Design Paradigm, will address the issues through a series of expert talks, case studies and site visit.
